

Inside Story

The latest Covid News

What is a CHO Directive

The Chief Health Officer sends information to all health services, business, schools and key organisation in community.

Sometimes, changes can happen quickly and it is important that this information is accurately retold to you and your community.

Information provided here is only sourced from the Chief Health Officer (CHO), with all information to be followed for the Safety and Well-being of the Community.

CHO Directives are mandated, meaning we must follow this advice.
